ABOUT THE COMMISSION

The South Carolina Commission for Minority Affairs was created in 1993 by the General Assembly to provide the citizenry of the State with a single point of contact for information regarding the State's minority population.

Additionally, the Commission was created to:

- *study the causes and effects of the socio-economic deprivation facing minorities and work to implement initiatives to alleviate such deprivation;*
- *establish a database of statistical information for distribution to members of the General Assembly and other entities capable of effecting change;*
- *be the State's clearinghouse for minority statistical information and to publish a Statewide statistical abstract on minority affairs;*
- *provide communities with a single point of contact to obtain raw data and information necessary for local research and planning;*
- *liaison with community leaders, businesses and elected officials to build the infrastructure needed to foster economic prosperity among the minority population;*
- *serve as the catalyst for identifying and linking funding and programs from both the public and private sectors;*
- *solicit funding for and coordinate programs necessary to address inequities confronting minorities in the State; and*
- *provide assistance and information on Voting Rights Act submissions, as well as other related issues.*

FOREWORD

South Carolina ranks fifth in the nation behind the District of Columbia and the States of Hawaii, Mississippi, and Louisiana in minority population. South Carolina population ranks fourth in the nation in terms of the number of African Americans, following behind the District of Columbia, and the States of Mississippi and Louisiana.

Minorities constitute 31.0 percent of South Carolina's population, with African Americans representing 96.1 percent of all minorities in the State.

With such a large minority population, it is imperative that information regarding the socio-economic status of minorities and their contribution to the overall socio-economic prosperity of the State be well researched and documented.

This report and subsequent documents published by the Commission, will provide data that will be useful in determining the best way to disperse limited state and federal resources and implement new and better targeted public policy initiatives.
